SUMMARY

Software engineer with 5 years of experience building production systems for government and insurance clients. Strong background in C#, .NET, React, Azure, SQL, and legacy system modernization. Taking ownership of hard problems, keeping stakeholders in the loop, and ship code that has been thoroughly tested. Enjoys solving complex technical challenges, and developing software that has a measurable impact on the business.

EXPERIENCE

Solutions Specialist, Consultant Deloitte Remote *April 2024 to Present*

- Lead a 5 developer team building a new React UI section for FLDCF app modernization, part of a 200 person program for the Florida Department of Children and Families.
- Developed 200+ C# APIs with a required sub 5 second response time, using reusable async patterns to eliminate duplicate work and keep delivery timetables met.
- Built frontend and backend logic for a data comparison tool called wizards pulling from 4 government data sources, helping caseworkers accurately process benefits cases.
- Offered alternatives to scope when older databases made requests impossible, keeping the team from wasting time and helping to meet the production timeline.
- Built a C# batch process that ingests and aggregates over 103 million rows across 200 columns and writes output to SFTP in under 8 minutes reliably.

Software Engineer Brown & Brown Insurance Hybrid - Daytona Beach, FL *Oct 2021 to April 2024*

- Developed a monthly legal survey system using Azure Functions, C# .NET 6, and MSSQL that sends 6,000+ emails with timed reminders for compliance tracking and lawsuit protection.
- Built a secure file sharing platform in Blazor with Entra External ID for internal and external insurance users transferring large documents between brokers and carriers.
- Created centralized REST APIs in C# for user authorization, PDF conversion, and OCR, all secured and monitored through Azure API Management.
- Built Power BI dashboards off Qualys data so security leaders could track vulnerability trends without digging through raw exports.
- Guided 5 teams of summer interns by providing them with enough knowledge to solve their coding problems.

IT Resource Specialist Stetson University DeLand, FL *May 2021 to Oct 2021*

- Supported students, faculty, and staff with hardware, software, printers, and day to day technical issues across campus.
- Coached intern IT assistants and managed equipment swaps and upgrades with minimal disruption to faculty schedules.

EDUCATION

B.S. Computer Science Stetson University, DeLand, FL *July 2021*

A.A. Degree Daytona State College, Daytona Beach, FL *May 2018*

SKILLS

Languages and Frameworks: C#, .NET, React, Python, Java, SQL, JavaScript, Blazor, Restful API's, Swagger

Cloud, Data, and Tools: Azure Functions, Azure Dev Ops, Azure Web Apps, Azure API Management, Azure Blobs, Azure Storage Containers, Power Platform, Entra ID, MS SQL Server, Oracle, Power BI, Git, Docker, Visual Studio, VS Code, SurveyJS, Burp Suite, AWS Buckets

Community Engagement

- Assistant Youth Director at First Church Deland.
- Trustees member at First Church Deland.
